

**Name:** 4pr-38\_1-508  
**Type:** Driving roller and bush chains  
**Subtype:** four-strand chain  
**GOST:** ГОСТ 13568-97  
**ISO:** 24A-4

## DESCRIPTION:

Driving roller and bush chains are designed for mechanical energy transfer from drive shaft to driven shaft in chain gear. These chains consist of hinged links providing chain flexibility.

## TECHNICAL DATA:

A: 45,44 mm  
Pitch цепи, t : 38,1 mm  
Ultimate tensile strength: 508 kgs  
1m chain weight: 22,0 kg

## DIMENSIONS:

External links distance (b3) not less: 25,40 mm  
Pulley diameter (d1) not more: 11,10 mm  
Bushing bore diameter (d3) not less: 22,23 mm  
Chain coupling width (b7): 197,1 mm  
Height (h): 36,20 mm

## DIMENSIONAL DRAWING:
