

IDFB-6.3-RG-1000

Name: IDFB-6.3-RG-1000

Russian name: ДН-6,3X-1000

Type: Single inlet centrifugal ID fans of IDFB type

Notes: Backward curved blades

DESCRIPTION:

Single inlet centrifugal ID Fans are intended to be used for flue gas removal from combustion chambers of solid fuel or gas-and-oil-fired boilers equipped with dry ash catchers. It is allowed to install such ID Fans in processing systems for handling compatible gases (The dustiness should be not more than 2 g/m3, abrasion and sticking tendency should be similar to ashed flue gases). Such ID Fans can be applied for single or serial-parallel operation. Double inlet centrifugal ID Fans can have right-hand or left-hand rotational direction. The right-hand rotation is in a clockwise order and it should be defined at electric motor side. The blades of impeller are backward curved.

AERODYNAMIC PERFORMANCE:

Capacity: 3.4 ths. m3 Total pressure: 390 Pa Temperature: 200 C Efficiency: 83 %

Dustiness: 2.0 g/m3

DIMENSIONS:

Length: 2125 mm Width: 1240 mm Height: 950 mm Weight: 485 kg

ELECTRIC MOTOR:

Power: 3 kW

Rate speed: 1000 rpm

Moment of inertia: н/д kg*m2

AUXILIARIES: Actuator: 100 Hm
